Customer Problem Statement Template:

This problem statement highlights the major issues faced in public complaint redressal, especially in urban and semi-urban settings. Based on insights from citizens, local government officers, and municipal staff, the core problems include lack of transparency, delayed responses, and inefficient tracking of complaints. These issues lead to public dissatisfaction, administrative overload, and poor accountability. A centralized, digital, real-time complaint resolution platform like ResolveNow is essential to address these challenges and restore trust in civic systems.
