Problem – Solution Fit Template:

There is no centralized and streamlined platform that allows citizens to raise, track, and resolve complaints in real time, causing delays, miscommunication, and a lack of accountability in grievance redressal mechanisms.

Purpose:

ResolveNow provides an integrated web-based platform with the following capabilities:

- **User-Friendly Complaint Submission:** Easy form-based interface to submit issues with location and attachment.
- **Live Communication:** Real-time chat between users and assigned agents for fast clarifications.
- **Smart Routing:** Automatically assigns complaints based on category or department.
- **Admin Control Panel:** For managing assignments, tracking KPIs, and generating reports.
- **Status Notifications:** SMS/email alerts for updates on complaint progress.
- **Scalability:** Modular design supports multiple departments or cities with minimal setup.
