

Project Design Phase
Proposed Solution Template

Date	18 June 2025
Team ID	LTVIP2025TMID58466
Project Name	ResolveNow – Your Platform for Online Complaints
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Citizens often face difficulties registering complaints with government or service providers. There's lack of a centralized system for tracking, communication, and resolution, leading to delays, lack of transparency, and frustration.
2.	Idea / Solution description	ResolveNow is a web-based platform that allows users to submit complaints digitally, track them in real-time, and communicate with resolving agents via chat or video. It includes a dashboard for administrators to manage workflows and ensure accountability.
3.	Novelty / Uniqueness	Unlike traditional grievance forms or static portals, ResolveNow offers real-time chat with agents, smart complaint routing, and automated status updates. It focuses on transparency, communication, and rapid resolution.
4.	Social Impact / Customer Satisfaction	Helps citizens get faster and more transparent resolutions. Encourages trust in public systems and improves satisfaction by reducing manual overhead and miscommunication. Especially useful in urban and semi-urban areas where digital access is growing.
5.	Business Model (Revenue Model)	Initially provided as a free and open-source solution for institutions and municipalities. Later monetization through SaaS offerings, custom integrations, API licensing for private entities, or analytics services.
6.	Scalability of the Solution	The solution can be scaled across cities, states, or organizations. It supports role-based access and modular components like chatbot, multilingual UI, and can be integrated into mobile apps for mass adoption.
